

BIM Captain

23 Degrees North is looking for a dynamic person to join the firm's Architecture consultancy as a BIM Job Captain in their Pune office. The ideal candidate will be an intern architect and will be responsible for providing the office production staff with REVIT® leadership on a wide range of projects. The position entails the production of detail design construction documents for a wide range of projects. Solid sustainable design practices are inherent in every project designed by 23 Degrees North, and we use BIM/REVIT® to leverage those practices for the benefit of our clients.

BIM Job Captains primary function is to manage the process of virtually constructing a building and documenting the design contract documents accurately. This would encompass managing a small team of production technicians, taking ownership of the construction-documents set and co-ordinating information. It is critical for the BIM Captain to lead model management and BIM planning, collaboration and coordination on projects they are leading. The BIM Captain will be the first point of contact and go-to person on the project for modeling, documentation and verifying design intent during Design Development and Construction Drawing Phase.

Duties & Responsibility's

1. Create initial REVIT® Project setup with workflow documents.
2. Initiate Model for each project and prepare for production team.
3. Provide BIM/REVIT® project kick-off information.
4. Work as part of a BIM/CAD support team to achieve consistent results.
5. Daily model management administration and maintenance,
6. Provide REVIT® Architecture desktop support.
7. Over-the-shoulder training, developing and shadowing to staff.
8. Content creation: Families such as parametric, formula, nested and type catalogs.
9. Support linked views and others in multiple models situation.
10. Establish and enforce effective project quality procedures. Assist BIM Corporate staff in deploying project-templates on specific projects and ensuring team adherence to them.
11. Coordinating with design staff located remotely in Oman staff on reviewing models and comments via Design-Review.
12. Good level of English verbal and written communication to communicate effectively with remote design team located in Oman and to fostering teamwork amongst junior staff.
13. Manage software and systems within Pune.
