

BIM Technician

23 Degrees North is looking for a dynamic person to join the firm's Architecture consultancy as a BIM Technician in their Pune office. The ideal candidate will be a skilled BIM software modelling expert with solid understanding of their specific architecture design discipline focusing on the architectural systems of a building design and leveraging REVIT® ARCHITECTURE.

BIM Technicians primary function is to support the BIM Captain in the production and management of virtually constructing a building and creating accurate design documents. This role can also be represented by junior professional architects and/or engineers depending on their training, role in the firm and technology appetite to execute design utilizing BIM.

Duties & Responsibility's

1. Ability to work under the direction of BIM Captain
2. Good knowledge of BIM/REVIT® modelling and Autodesk Autocad 2D
3. Ensure detail design and construction documents accuracy based on BIM modelling
4. Work as part of a BIM/CAD support team to achieve consistent results.
5. Collaborate and Coordinate with other disciplines design-changes and model challenges.
6. Adhere to BIM Execution Plan and BIM project work-flow criteria.
7. Follow BIM content standards and development procedures.
8. May take the lead on developing some discipline specific BIM modelling content for project.
9. Print drawing sets for professional team and participate in design reviews where necessary
10. Adhere to effective project quality procedures.
11. Ability to export DWF and other formats for collaboration internally and externally.
12. Good level of English verbal and written communication
13. Leveraging BIM software and tools as a methodology to coordinate design documentation.
